

## Visualizing America in 10 years

A new \$2 Trillion [mobile industry](#) is forming with 150 startup companies, Google, Apple & car manufacturers preparing their entries. This is ours.

We have spent over 10 years and \$500,000 in R&D for this project and are ready to show it to the marketplace. Skyways is part of a new mobility industry has the potential to change civilization. Eventually a \$2 trillion market is envisioned for mobile tech that has most of the big digital companies preparing to enter. This includes Google, Apple, Intel, the car manufacturing industry and over 100 new startup companies all preparing their entry.

Our plan is to start very small with only \$1,300,000 to mobilize a company. This builds a scaled model and software lab. These funds also include the engineering of a full scale 70' mockup section. Then followed by \$4 million for a testing site and shops. Up to \$6,000,000 for a ¼ mile testing track and finally \$14 million for a one mile/3 station sales model. The first sales are expected to be in a \$200 million range for 10 to 15-mile operating routes. We are evaluating several opportunities with operating profits growing from 5% to 30 % over 25 years.
